The HSE Global Services Team

HSE Global is an Australian owned and operated business with a diverse and extensively experienced services team who support our business partners in the successful, safe and sustainable delivery of major infrastructure projects. The team offers complete Quality, Health, Safety and Environmental governance and assurance to operations through structured and seamless QHSE management systems, supportive documentation development and implementation, auditing and pre-audit gap analysis with action plans to simplify and compliment requirements.

We specialise in providing support across the Australasian Pacific Region in the Renewable Energy, Construction, Utilities, Mining and Resources sectors. Our extensive experience, empathy and understanding allow us to provide customised solutions to dramatically improve the safety performance of our clients, resulting in less injuries and incidents, enhanced productivity, robust governance and improved stakeholder satisfaction.

Our team of QHSE professionals have successfully delivered seamless HSE outcomes for our partners on Major CAPEX Projects in the \$1 million to \$250 million range. Our mission is aligned with our values with regards to QHSE management on projects. This is to ensure that our clients have peace of mind know that they are getting a renowned and fully insured professional service.

Our Values

FAMILY FIRST

We treat everybody as if they were part of our own family because we care. Customer, Team Member, Contractor, Friend or first time introduction.

THIS IS OUR FOCUS

LEAD THE WAY

We role model the change, we positively support and challenge a better tomorrow and we learn by doing.

THIS IS OUR ALIGNMENT

THINK SUSTAINABLY

Every action makes a difference, to our health and safety, the environment, the risk we accept now and for future generations.

THIS IS OUR DISCIPLINE

Our HSE Services Team

Our Team are confident with the procurement, installation logistics and the operation compliance of construction related machinery and equipment including, but not limited to, tower cranes, concrete placement equipment, high capacity mobile cranes and a range of other mobile plant, equipment and machinery. We offer audits and inspections on plant and equipment to ensure compliance for site, internal or regulatory requirements.

THE SERVICES TEAM SPECIALISE IN THE DELIVERY OF QUALITY, HEALTH, SAFETY AND ENVIRONMENTAL GOVERNANCE AND ASSURANCE IN OPERATIONAL EXCELLENCE

The HSE Services Team have continuously supported and lead the way with over 200 Client, Third Party and Internal audits by providing support you can rely on whilst also coaching and mentoring the team in achieving outcome percentage values over 90%, from previous outcomes in the 70% range. The team has developed a QHSE folder System that compliments accredited businesses by ensuring they meet the accreditation requirements. This system has been implemented on a global scale with some of our business partners.

Commitment, Capability and Capacity to support effective HSE management

Making a Difference Every Day

What We Offer

Integrated Risk Management Support

HSE Global Services are committed to making a difference every day. We deliver a wide range of services to evaluate WHS risk, recommend and implement controls to continuously improve WHS performance. Our services include, but not limited to:

- Development of risk registers through construction risk workshops within the renewable energy sector
- Facilitation of windfarm EPC construction risk workshops
- Review of client and contractor risk management documentation against internal, external and regulatory requirements
- Health monitoring, including site-based dust monitoring and drug and alcohol testing
- Compliance inspections of plant and equipment operating on construction, utilities and mining sites
- Monitoring of WHS compliance through auditing programs and behavioural based safety systems
- Providing internal training and support to existing employees
- Development of hazard identification and risk management processes that integrate existing WHS, environment and/or quality management systems to simplify and unify frameworks.

Incident Investigation Support and Facilitation

We lead the way, support and facilitate incident investigations with our partners using industry recognised methodologies such as ICAM, Taproot and the 5-Why technique to determine organizational, people and operational contributing factors and to provide practical recommendations and solutions.

Audit Services

We think sustainably when it comes to the auditing process. Our team are qualified and confident in facilitating internal, external and third-party audits on behalf of our business partners to ensure compliance with company, state and regulatory requirements. The diverse and extensive experience of our team assists in meeting WHS and Environmental obligations through previous successful audits and verification activities. Our Team have successfully moved our clients from an average audit score of 70% to the 90% range through confidence, support, guidance and mentoring to ensure our clients have a more robust and sustainable WHS Management System.

“Your Team are a credit to the achievement of high Audit scores through dedication and persistence and demonstrating the capabilities of our Construction Teams” VESTAS

“Thank you for your dedicated and professional assistance, looking forward to future engagements”

“The Service Director was extremely happy with the investigation report and layout and made comment on its value for sharing with customers and stakeholders. In his own words “Money well spent” VESTAS

“Efficient and Professional Construction Management Plans development, review and implementation. Efficient capabilities with Safe Work Method Statement development, review and approval” QUANTA SOLAR
