Brent Bolton
Digital Solutions Manager

Brent Bolton is the Digital Solutions Manager for HSE Global and is a highly experienced software developer and systems analyst with over 25 years of experience.

Originally from Sydney, Brent began his career with BHP Information Technology in Wollongong in 1995, commencing as a cadet, which enabled him to gain valuable experience while simultaneously earning part-time his Bachelor of Engineering (Computers) (Hons) degree from Wollongong University. During this time Brent was heavily involved in the planning and implementation of upgrades to both the Port Kembla and Whyalla Steelworks steelmaking process control systems, integrating a multitude of different technologies.

Brent graduated in 2001 and, with the concurrent purchase of BHP Information Technology by CSC, continued in this role when he helped to develop, maintain and enhance these systems. In 2008, seeking new challenges, Brent was seconded to the CSC Network Tools Team where he gained valuable experience regarding networks and security, while simultaneously using his software development experience to improve their bespoke monitoring tools.

In 2015, with a desire to move into web-based development, Brent joined Website Travel, and with their small team of developers improved and supported their flagship point of sale booking website. During this time Brent gained valuable experience with web-based technologies and led the way branching into newer technologies.

In 2018, Brent joined Global Safety Index as their Digital Solutions Manager and immediately set to work launching the then new GSI Gen2 system. Brent's desire for continuous improvement sees him constantly looking for ways to enhance HSE Global's IT Toolset. In addition to Brent's technical expertise, he is also an Accredited Mental Health First Aider.

Brent resides in Wollongong, Australia with his wife and three children.
