

# Audit and Assurance: WHS Risk Management and Control

Knowing which activities in your business have potential to harm your people and, more importantly, understanding if these risks are well controlled is pivotal to creating a safer workplace.

HSE Global assists organisations **verify** that critical controls are in place and working effectively. This is a key WHS due diligence obligation for Company Officers and is the foundation for keeping your people safe from serious harm incidents.

Our independent audit and assurance services are an essential component of best practice in health, safety and wellbeing management. We provide data and insight that is independent of internal arrangements and answer the following key questions:

- Do you know that risk controls, especially critical controls, are effective?
- Is your HSE management system operating as intended?
- Are your teams implementing procedures as documented?
- Do our contractors meet the required standards?

*HSE Global audits are not a paperwork exercise. They find the real issues as to why our controls are not as effective as they could be.*

HSE Global’s audit and assurance service provides our clients with the most thorough and robust assessment of the effectiveness of their risk controls, highlight examples of excellence and uncover issues that impact on effective risk control. We delve deeply into the day-to-day behaviours, sub-cultures and leadership approaches at site and in the office. We build a natural rapport with Executives, Managers, Front-line Leaders, Employees and Contractors throughout the audit and assurance process, enabling candid qualitative research to identify gaps and opportunities to improve and truly test the effectiveness of risk controls “in practice”.

## Audit Methods:

**In-field Observation:** Verifies the effective implementation and effectiveness of WHS risk controls in the workplace.
