

Graeme Agnew

Technical Manager, Transport Safety and Logistics

Graeme is the Technical Manager Transport Safety & Logistics with HSE Global Services Division and is a highly experienced safety professional with over 30 years in technical and senior leadership roles in diverse industries such as manufacturing, construction, transport and logistics, and councils. Graeme has a strong background in steel having worked for many years with BlueScope Steel at a national and international level.

Graeme is an operationally focussed professional who is passionate about understanding and driving those behaviours that lead to a positive change in a high performing safety culture.

Graeme's career started out as a mechanical engineer and soon after, transferred to operations and coordination with MM Kembla Products and BlueScope Steel, growing to wear 'many hats' including Site Operations Manager, Health Safety and Environment Manager – NSW and Senior Logistics Engineer.

Graeme's key strengths include:

- Reviewing existing and developing new Transport Safety and Chain of Responsibility risk assessments, management plans, policies and procedures
- Conducting site inspections and audits of heavy vehicle operations across multiple industries including construction, manufacturing, distribution, councils and retail
- Developing and delivering Transport Safety and Chain of Responsibility training including in the areas of load restraint, fatigue management, speed compliance, mass and dimension management and vehicle standards to managers, supervisors, loaders and drivers.
- Providing technical expertise and support to clients in Chain of Responsibility, transport and logistics safety and load restraint
- Developing technical standards and providing expertise around high-risk activities to businesses
- Coaching and mentoring safety professionals, site managers, supervisors, loaders and drivers on technical aspects of high-risk activities
- Analysing productivity and consulting with operational teams regarding challenges and opportunities for improvement

Graeme prides himself on his approachable and strong work ethic, as well as his ability to quickly learn new skills, processes and systems. He is confident in engaging and influencing at all levels, from Corporate Management to those in the field on the frontline, with the ability to think strategically across all sites and the value chain.

In addition to Graeme's practical experience in safety leadership, he holds a Masters in Business and Technology from the University of New South Wales and a Certificate IV in Training and Assessment.

Outside of work Graeme resides in the Illawarra area with his wife and four children. He is an active member of the swimming community at both local and state level where he serves as a Technical Official, including being selected to officiate on pool deck at the Sydney Invictus Games in 2018.
